Year end	31 December
Custodian	Brown Brothers Harriman

Risks

The Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. For full information on the risks, please refer to the Prospectus, Supplement, and KID/KIID for the Fund, which are available on our website.

Simulated past performance in since launch numbers. Performance prior to the launch date of the Y class (11.03.15) uses a higher charging share class in line with standard methodology. Source: FE fundinfo net of fees to 30.09.26. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the OCF. The current OCF is 0.77%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return.
Historic yield reflects the distributions declared over the past 12 months expressed as a percentage of the mid-market price, as at the latest month end. It does not include any preliminary charges. Investors may be subject to tax on the distribution.

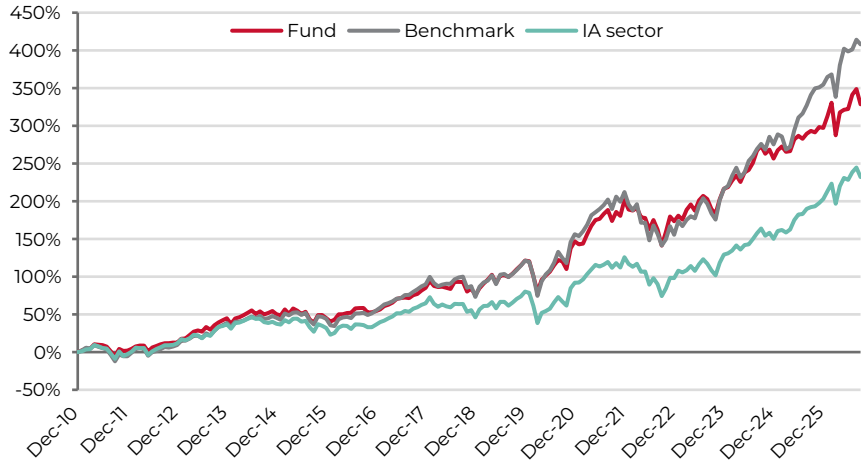
Performance Since Launch (USD)



Guinness Global Equity Income

Continued

Fund Profile

Aim

Income and long-term capital growth

Investment Case

Provides global exposure to dividend paying companies. Dividend payers outperform in the long term, dividend growers even more so. Dividend paying companies can protect against inflation over the long term.

Process

Starting point is quality, not yield. Focus on companies generating persistently high returns on capital over the last decade.

Portfolio

Concentrated, typically equally-weighted portfolio of 35 stocks, which reduces stock specific risk and instils a strong sell discipline. Low turnover; minimum $1bn market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Objective

An equity fund investing primarily in global equities which provide a yield above the yield of the benchmark (MSCI World Index).

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

For the avoidance of doubt, if you decide to invest, you will be buying units/shares in the Fund and will not be investing directly in the underlying assets of the Fund.
