The Fund should be viewed as a medium to long-term investment only. As the portfolio is concentrated, this has the potential to increase the volatility of performance. If you are in any doubt about the suitability of investing in this Fund, please consult your investment or other professional adviser.

Source: FE fundinfo net of fees to 31.10.26. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF is 0.77%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Historic yield reflects the distributions declared over the past 12 months expressed as a percentage of the mid-market price, as at the latest month end. It does not include any preliminary charges. Investors may be subject to tax on the distribution.

Income and long-term capital growth

Investment Case
