Risks

WS Guinness Global Innovators Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on the website www.waystone.com. If you are in any doubt about the suitability of investing in this Fund, please consult your investment or other professional adviser.

Source: FE fundinfo net of fees to 31.07.26. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF is 0.79%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return.

Fund Profile

Aim

Long-term capital growth.

Investment Case

Provides global exposure to companies benefiting from innovations in technology, communication, globalisation or innovative management strategies. Innovation can take many forms, not just disruptive tech-driven products. It is the intelligent application of ideas and is found in most industries and at different stages in company lifecycle.

Process

Focus on companies with ability to earn above average return on capital at any stage in their lifecycle: early stage disruptive companies; more established, growth-phase companies; established companies with a culture of improvement in their product, processes, or business model. Strict value discipline to avoid over-hyped companies.

Portfolio

Concentrated, typically equally-weighted portfolio of 30 stocks, which reduces stock-specific risk and instils a strong sell discipline. Low turnover; minimum \$1bn market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Objective

An equity fund which invests in global equities. The companies invested in will have, in the manager's opinion, innovation at the core of their business. The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

If you decide to invest, you will be buying shares in the Fund and will not be investing directly in the underlying assets of the Fund.

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 6 because its volatility has been measured as above average to high.
