Fund ESG Ratings

MSCI ESG Rating™:

Produced by MSCI ESG Research as of 31.12.25.

SFDR Classification

Fund Profile

Benchmark

MSCI World Energy

Investment Objective

An equity fund investing primarily in globally based companies principally engaged in the production, exploration or discovery, or distribution of energy derived from fossil fuels and the research and development of production of alternative energy sources.

Investment Case

Provides exposure to growth opportunities in energy equities. Global population growth, industrialisation and diminishing fossil fuel supplies, pushing energy prices higher, and creating a favourable environment for energy companies. Energy equities can be a long-term hedge against inflation.

Domicile

Ireland

Risks

Guinness Global Energy Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in the energy sector; it is therefore susceptible to the performance of that one sector, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. For full information on the risks, please refer to the Prospectus, Supplement, and KID/KIID for the Fund, which are available on our website.

²Cluster munitions, landmines, and biological and chemical weapons.

³Companies that generate more than 30% of revenues via thermal coal extraction or thermal coal power generation.

ESG Integration Summary

The investment team use a bottom-up ESG framework, developed in-house, to assess quantitatively the sustainability risk associated with current and potential underlying investments. Using the SASB materiality framework, the team have developed a scorecard that is used to evaluate a company based on various industry-specific ESG criteria. 'Materiality' and 'transparency' are two key components of the scorecard: the materiality component ensures the key risk factors to a company's operations are assessed, and the transparency component informs the team of the drivers of ESG scores at a granular level.

The team supplement this with a rigorous qualitative review, which features assessments of material risks and opportunities, good governance, executive remuneration, carbon transition, and exposure to negative externalities. Further information is available in the fund's Approach to Responsible Investment and ESG paper, available [here](#).

Fund Weighted Average Carbon Intensity (WACI)* in tCO₂e/\$M revenue

The fund's carbon intensity is measured and reported over time.

Source: Guinness Global Investors, CDP; Coverage: 100% (2021, 2022, 2023, 2024, 2025).

*The Weighted Average Carbon Intensity (WACI) metric is calculated by multiplying the carbon intensity (emissions relative to revenue in millions USD) of each fund holding by its portfolio weight (the value of the holding relative to the total value of the portfolio, excluding cash). Carbon intensity is based on Scope 1 and 2 emissions. Scope 1 emissions are direct greenhouse gas emissions from sources that are owned or controlled by the company. Scope 2 emissions are indirect greenhouse gas emissions from the generation of energy purchased by the company (Reference: GHG Protocol). Coverage refers to the percentage of the carbon intensity data available at the date of publication for underlying fund holdings (as a percentage of total assets excluding cash).

Stewardship

Stewardship activities form part of the investment process applied by the team. We believe that resourcing our stewardship activities within the investment team itself, with dedicated assistance as required, is the best way to ensure effective stewardship. The investment team's ESG incorporation approach often informs their proxy voting and engagement activity. In a spirit of transparency, we disclose fund-level voting and engagement statistics and case studies for calendar year 2025 below.

Voting

The investment team make their own voting decisions based on their own research, supported by proxy voting research from Glass Lewis. All voting is undertaken by the investment team, with oversight provided by our Responsible Investment Committee. In order to vote, some markets require shares to be temporarily immobilised from trading until after the shareholder meeting has taken place (referred to as 'share blocking'). Some other markets require a local representative to be hired, under a Power-of-Attorney (POA), to attend the meeting and vote on our behalf. In such instances, it may sometimes be in clients' best interests to refrain from voting. But in all other circumstances we endeavour to exercise our voting responsibilities on clients' behalf. For more information, please see our Voting Policy, available on our website.

Voting Overview *	
Number of companies available to vote	30
Number of available proposals	446
% voted	100%
% did not vote**	0%
% votes in line with management	71%
% votes against management	29%

Votes against management by topic (%)**

● Audit/Financials	15%
● Board Related	53%
● Capital allocation	2%
● Compensation	23%
● Shareholder proposals	5%
● Other	2%

***May not sum to 100% due to rounding.

*1st January 2025 to 31st December 2025

**This includes where we do not vote in jurisdictions where share blocking is in effect or power of attorney requirements apply

Voting Case Studies

TotalEnergies

At the 2025 TotalEnergies AGM, we voted against the nomination of Mr. Laurent Mignon to the board of directors due to concerns regarding potential overboarding and his ability to dedicate sufficient time and attention to his responsibilities as a non-executive director. At the time of his candidacy, Mr. Mignon was Group CEO of Wendel Group, a major shareholder in Bureau Veritas, whose board he also chaired. Combined with his non-executive director role at LVMH Moët Hennessy Louis Vuitton, we considered his pre-existing commitments to be significantly time demanding.

We note that approximately 40% of shareholders also voted against his election, indicating broader investor concern. We will continue to monitor TotalEnergies' board composition and governance practices.

Devon Energy is a US-based oil and gas producer focusing on five onshore operations across the US. At the 2025 AGM, we voted against Devon's advisory resolution on executive compensation, alongside c.35% of shareholders, reflecting concerns with the design of the company's remuneration structure.

Devon's short-term incentive plan (STIP) included a production-linked metric (10% weighting), which we believe can encourage volume-driven decision-making rather than capital discipline and operational efficiency. Instead, we would prefer the company to incorporate returns-based metrics or emissions reduction targets. We also had concerns around the long-term incentive plan (LTIP) structure, which was fully weighted to relative TSR. We believe overemphasising TSR is not optimal within a remuneration framework, as share price appreciation is more an outcome of strong operational performance rather than a direct target in itself. Furthermore, share price performance can be influenced by external factors, such as shifts in investor sentiment based on the economic cycle, which are beyond management's control. We have been engaging Devon since 2021 on its remuneration structure, and seeing limited improvement recently, escalated our stewardship activity by voting against the Remuneration Committee Chair.

Engagement

The investment team's 2025 engagement included discussions with portfolio holdings around their climate-related disclosure, target setting, and incentivisation and governance.

Engagement Overview*	
Number of company interactions	8
Number of engagements	7
Engagements by topic	
Environment	100%
Social	0%
Governance	0%
Strategy***	100%

*1st January 2025 to 31st December 2025
Source: Glass Lewis; Guinness Global Investors (31.12.25)

**In some cases, multiple topics are covered in a single meeting and the totals do not add up to 100%.
***Strategy includes disclosures, opportunities in sustainable products, positive impact, and regulation.

Engagement Case Studies

PetroChina

PetroChina is an integrated Chinese energy company. In 2025, we participated in the CDP Non-Disclosure Campaign, which offers investors the opportunity to engage with companies that have received the CDP disclosure request but have not yet provided a response. The objective of the annual campaign is to drive further corporate transparency around climate change, deforestation, and water security. We were selected to act as lead signatory for PetroChina, requesting the company submit to the latest CDP reporting cycle and emphasising the importance of transparency in climate-related disclosures. We were encouraged by our correspondence with the company and were pleased to see PetroChina make a submission to the cycle. We look forward to continuing discussions with the company on enhancing environmental visibility and accountability.

Over 2025, we continued our engagement with Canadian integrated energy producer **Imperial Oil**. The year saw a number of changes to the Canadian regulatory landscape, which presented a timely opportunity to discuss the company's perspective and approach. During our discussions, Imperial Oil highlighted its asset-level emissions reporting submitted to the Canadian government, which can serve as a useful proxy for Scope 1 and 2 emissions in the absence of formal ESG reporting. After integrating this data into our systems, we identified that a major third-party provider had significantly overstated the company's emissions. We engaged with both the provider and the company to help ensure the data was correctly captured going forward.

Collaborative engagement

Since 2019, we have been members of **Climate Action 100+**, the world's largest-ever investor engagement initiative on climate change. We collectively engage with a Canadian energy producer, across a wide range of topics including remuneration and emissions targets.

We are a member of **CDP**, which allows us access to environmental data for all companies that report to CDP. Through our membership, we participate in collaborative engagements, such as the CDP non-disclosure campaign (NDC). The NDC aims to drive further corporate transparency around climate change, deforestation and water security, by encouraging companies to respond to CDP's disclosure requests.

Initiatives

We participate in relevant industry initiatives to promote the proper functioning of markets, responsible investing, and the management of market-wide and systemic risk. Where appropriate, members of the investment team will use initiatives to engage collaboratively with portfolio companies.

External company ratings

Signatory of:

We became signatories to the United Nations Principles for Responsible Investment (UN PRI) in 2019, which provides external assurance on our stewardship approach broken down by activity.

In our latest Assessment Report, published in 2024, we received the following scores:

Policy Governance and Strategy

Direct - Listed Equity - Active Fundamental

Confidence Building Measures

Industry Initiatives

CFA UK's mission is to build a better investment profession by serving the public interest by educating investment professionals, by promoting and enforcing ethical and professional standards and by explaining what is happening in the profession to regulators, policymakers, and the media. A member of the investment team at Guinness is part of the Sustainability Community Champions group.

As the trade body for the UK investment management industry, the **Investment Association (IA)** seeks to represent the industry interests, improve the investment landscape through thematic initiatives, which highlight topics such as diversity and inclusion, and by improving standards and best practice.

The **Independent Investment Management Initiative (IIMI)** aims to contribute effective financial regulation and promote client-centred models of investment management. Our CEO, Edward Guinness sits on the board of IIMI.

The **UK Stewardship Code 2020** sets high stewardship standards for those investing money on behalf of UK savers and pensioners. It comprises a set of 12 'apply and explain' Principles for asset managers and asset owners to demonstrate their stewardship role and performance.

The **UK Sustainable Investment and Finance Association (UKSIF)** aims to support its members to grow sustainable and responsible finance in the UK. It also seeks to influence policymaking that promotes the growth of sustainable finance. Our Responsible Investment Lead is Chair of the Industry Development Committee, and another member of investment team serves on the Board of Directors and the Membership Committee.

The **FAIRR Initiative (FAIRR)** is a collaborative investor network that raises awareness of the material risks and opportunities in the global food sector. By providing research and coordinating engagement, it helps investors drive more sustainable practices in the agriculture and protein sectors.
