Risks

Guinness Global Innovators Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

Simulated past performance in ten year and since launch figures. The Fund was launched on 31.10.2014; performance data prior to this date is based on the actual returns of a US mutual fund managed by the same team using the same investment process as applied to the UCITS version.

Source: FE fundinfo to 31.08.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.88%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Graph data is in USD from 01.05.03.

Fund Profile

Aim

Long-term capital growth.

Investment Case

Provides global exposure to companies benefiting from innovations in technology, communication, globalisation or innovative management strategies. Innovation can take many forms, not just disruptive tech-driven products. It is the intelligent application of ideas and is found in most industries and at different stages in company lifecycle.

Process

Focus on companies with ability to earn above average return on capital at any stage in their lifecycle: early stage disruptive companies; more established, growth-phase companies; established companies with a culture of improvement in their product, processes, or business model. Strict value discipline to avoid over-hyped companies.

Portfolio

Concentrated equally-weighted portfolio of 30 stocks, which reduces stock-specific risk and instils a strong sell discipline. Low turnover; minimum \$500m market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Policy

An equity fund which invests in global equities. The companies invested in will have, in the manager's opinion, innovation at the core of their business.

The Fund is actively managed and uses the MSCI World Index as a comparator benchmark only.

Lower RiskHigher Risk

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 6 because its volatility has been measured as above average to high.
