Valuation	2300 Dublin time
Year end	31 December
Custodian	Brown Brothers Harriman

Risks

Guinness Global Real Assets Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. For full information on the risks, please refer to the Prospectus, Supplement, and KID/KIID for the Fund, which are available on our website.

Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). Transaction costs also apply and are incurred when a fund buys or sells holdings.

Top 10 holdings	%	Country	%	Sector	%

For regulatory reasons, we are unable to provide performance information where the track record is less than 12 months.

Fund Profile

Aim

Income and long-term capital growth.

Investment Case

Provides exposure to real asset owning companies active across infrastructure and real estate. The fund targets companies which build, finance, maintain and operate the physical assets that sustain daily life and enable economic growth. These companies can provide exposure to multi-decade growth in investment in sectors such as electricity generation, grid renewal, data centres, telecommunications, logistics and healthcare. Often benefiting from long-term contracted, inflation-linked revenue streams, giving defensive business models, they facilitate liquid exposure to underlying private market assets and can deliver differentiated sources of return and risk characteristics.

Process

Top-down and bottom-up approach combining a sector overlay with individual stock selection. Focus on quality infrastructure and real estate companies with persistent returns on capital, conservative balance sheets and stable dividends.

Portfolio

Concentrated, broadly equally weighted portfolio with low turnover and 35 stocks, which reduces stock-specific risk and instils a strong sell discipline. Stocks will normally have a minimum market cap of US\$500M.

Investment Objective

An equity fund investing primarily in global companies deriving a significant proportion of their business (at least 50% of revenues) from the financing, development, construction and operation of real assets including infrastructure and real estate. The Fund invests primarily in companies which pay dividends.

The Fund is actively managed and uses the MSCI World Core Infrastructure Index as a comparator benchmark only.

For the avoidance of doubt, if you decide to invest, you will be buying units/shares in the Fund and will not be investing directly in the underlying assets of the Fund.
