Risks

Guinness Multi-Asset Growth Fund is a multi-asset fund investing primarily in other funds ("Underlying Funds") which themselves may invest in equities, Government Bonds, fixed interest securities (which may include sub-investment grade securities), property and other investments.

Investors should be willing and able to assume the risks of equity investing. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement, and you may not get back the amount originally invested. Details on the risk factors are included in the Fund's documentation, available on our website.

Performance

Source: FE fundinfo to 31.08.22. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The current OCF for the share class used for the fund performance returns is 0.98%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return.

Performance Since Launch in GBP (%) - Past performance does not predict future returns

Performance (to Month End) - Past performance does not predict future returns

Fund (EUR)	+22.8%	-4.2%	+23.3%	-	-	-	-	-	-	-

Market Commentary

After the strong rise in equities during July, August saw retraction as concerns over inflation and energy risks took prominence. Emerging Markets was the only major index to show a small positive gain with Asia broadly flat. The S&P 500 by comparison fell 4.1% whilst the UK and Europe were down over 6%. Value, unsurprisingly, outperformed growth over the month as the potential of higher rates impacted future growth potential. The overweight positions to cash and Absolute Return helped to limit losses.

Markets reacted to the hawkish Jackson Hole speech from Fed chairman Jerome Powell which removed hope of a tapering in the size of interest rate rises. Markets now expect the Fed to increase interest rates by 75bps post September's meeting as non-farm payrolls grew larger than expected coupled with strong wage inflation numbers. This was despite US CPI falling to 8.5% and two quarters of negative growth. The change in rhetoric meant that the US dollar continued to strengthen, particularly against sterling.

Apart from inflation, energy prices featured as the Russian Nord Stream 1 pipeline was shut down and remained offline going into September. Concerns grow over Russia weaponizing gas against Europe pushing gas prices to new highs. This saw German producer prices increase by 37.2% in July. The UK saw a further 50bps rise in interest rates to 1.75% whilst the ECB flagged a further rate rise in September. The UK political backdrop remained in limbo as the conservative government went through its process of identifying a new leader.

Bond markets also fell over the period on the back of higher interest rates with Corporate Bonds outperforming Sovereign Debt.

Fund Profile

Investment Objective

The investment objective is to provide capital appreciation over the long term. Returns will be generated through both capital growth and income, with a bias towards developed and liquid capital markets. The risk will be diversified by holding collective investments in a range of asset classes and geographies. The management of the portfolio aims to meet the objective conservatively by taking managed risk through fund selection and asset allocation. The portfolio is based on the Brewin Dolphin International MPS Passive Plus Growth Strategy.

Investment Policy

The Fund is actively managed without reference to a benchmark. The Fund invests in funds in a range of different asset classes.

ABOUT BREWIN DOLPHIN

"Established in 1762, Brewin Dolphin has grown to become one of the UK's leading financial services firms with around 1,500 employees and 30 offices across Britain and Ireland. Brewin Dolphin are also one of the largest providers of investment management services in the UK, Channel Islands and Republic of Ireland, managing portfolios for both our own clients, charities and those of financial intermediaries.

The investment proposition is driven by an award-winning research team which undertakes research across markets, assets classes and individual companies. Overall, the company has around £42.3bn of assets under management." Brewin Dolphin Holdings PLC is listed on the London Stock Exchange and is a member of the FTSE 250 index.

Other share classes at other fee structures and currencies exist. Not all share classes are registered for sale in all countries where the Fund is registered for sale.

Lower Risk Higher Risk

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 5 because its volatility has been measured as above average.
