Valuation	1200 UK time
Year end	31 December
Custodian	BNY Mellon (Intl) Limited

Risks

The Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund only invests in the Asia region; it is therefore susceptible to the performance of that region, and can be volatile. Details on the risk factors are included in the Fund's documentation, available on the website www.waystone.com. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. If you are in any doubt about the suitability of investing in this Fund, please consult your investment or other professional adviser.

FE fundinfo net of fees to 31.03.25. Investors should note that fees and expenses are charged to the capital of the Fund. This reduces the return on your investment by an amount equivalent to the Ongoing Charges Figure (OCF). The OCF for the calendar year 2024 for the share class used for the fund performance returns was 0.89%. Returns for share classes with a different OCF will vary accordingly. Transaction costs also apply and are incurred when a fund buys or sells holdings. The performance returns do not reflect any initial charge; any such charge will also reduce the return. Historic yield reflects the distributions declared over the past 12 months expressed as a percentage of the mid-market price, as at the latest month end. It does not include any preliminary charges. Investors may be subject to tax on the distribution.

Guinness Global Investors is a trading name of Guinness Asset Management Ltd which is authorised and regulated by the Financial Conduct Authority

Fund Profile

Aim

Income and long-term capital growth

Investment Case

Provides exposure to dividend paying companies in the Asia Pacific region. Asia Pacific economies have developed and diversified due to factors including demographics, industrialisation, productivity gains and consumer spending. Value can be found in companies that have turned these themes into returns on capital above the cost of capital on a sustained basis.

Process

Quality: We look for companies that have sustained higher returns on invested capital which we believe are likely to persist. Value: We look for companies whose shares under-price the likely persistence of those returns on capital. Dividends: We look for companies that can grow their dividends.

Portfolio

Conviction: through a concentrated, typically equally weighted portfolio of 36 stocks, rebalanced periodically and managed on a one-in/one-out basis. Low turnover; minimum \$500m market cap; no benchmark-driven constraints on sector and regional weightings.

Investment Objective

An equity fund investing in companies in the Asia Pacific region or deriving at least 50% of their revenues from business activities in the region. The companies invested in will primarily pay dividends. The Fund is actively managed and uses the MSCI AC Asia Pacific Ex Japan Index as a comparator benchmark only.

Ratings & Awards

Issued by Guinness Global Investors which is a trading name of Guinness Asset Management Limited which is authorised and regulated by the Financial Conduct Authority. This document is provided for information only. All the information contained in it is believed to be reliable but may be inaccurate or incomplete; it should not be relied upon. It is not an invitation to make an investment nor does it constitute an offer for sale. Telephone calls will be recorded.

Typically Lower Rewards					Typically Higher Rewards	

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 5 because its volatility has been measured as above average.
