Risks

WS Guinness Global Energy Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in the energy sector; it is therefore susceptible to the performance of that one sector, and can be volatile. The Fund should be viewed as a medium to long-term investment only. As the portfolio is concentrated, this has the potential to increase the volatility of performance. Details on the risk factors are included in the Fund's documentation, available on the website www.waystone.com. If you are in any doubt about the suitability of investing in this Fund, please consult your investment or other professional adviser.

This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free. The fund has been classed as 7 because its volatility has been measured as high.
