This is a marketing communication. Please refer to the prospectus and KID/KIID for the Fund, which contain detailed information on the Fund's characteristics and objectives, before making any final investment decisions. All data as at above date, unless otherwise stated. Past performance is not a reliable indicator of future results.

Fund ESG Ratings

MSCI ESG Rating[™]:

Produced by MSCI ESG Research as of 23.01.25.

SFDR Classification

Fund Profile

Benchmark

MSCI World

Investment Objective

An equity fund that invests primarily in globally based companies principally engaged in the provision of asset management services.

Investment Case

Provides global exposure to the growth potential of asset managers. Successful asset managers can grow very rapidly, particularly in rising markets. Their risk-return characteristics are especially attractive, since they tend to require relatively little capital to grow. Asset management is also a growing global sector: assets under management are rising faster than underlying equity markets.

Domicile

Ireland

Risks

Guinness Global Money Managers Fund is an equity fund. Investors should be willing and able to assume the risks of equity investing. The Fund invests only in companies involved in asset management and other related industries; it is therefore susceptible to the performance of that one sector, and can be volatile. The value of an investment and the income from it can fall as well as rise as a result of market and currency movement; you may not get back the amount originally invested. For full information on the risks, please refer to the Prospectus, Supplement, and KID/KIID for the Fund, which are available on our website.

Fund Weighted Average Carbon Intensity (WACI)* in tCO₂e/\$M revenue

The fund's carbon intensity is measured and reported over time.

Source: Guinness Global Investors, CDP; Coverage: 100% (2021, 2023, 2024), 95% (2022).

INNESS

*The Weighted Average Carbon Intensity (WACI) metric is calculated by multiplying the carbon intensity (emissions relative to revenue in millions USD) of each fund holding by its portfolio weight (the value of the holding relative to the total value of the portfolio, excluding cash). Carbon intensity is based on Scope 1 and 2 emissions. Scope 1 emissions are direct greenhouse gas emissions from sources that are owned or controlled by the company. Scope 2 emissions are indirect greenhouse gas emissions from the generation of energy purchased by the company (Reference: GHG Protocol). Coverage refers to the percentage of the carbon intensity data available at the date of publication for underlying fund holdings (as a percentage of total assets excluding cash).

Responsible Investment Factsheet

Stewardship

Stewardship activities form part of the investment process applied by the team. We believe that resourcing our stewardship activities within the investment team itself, with dedicated assistance as required, is the best way to ensure effective stewardship. The team's ESG incorporation approach often informs their proxy voting and engagement activity. In a spirit of transparency, we disclose fund-level voting and engagement statistics and case studies for calendar year 2024 below.

Voting

The team make their own voting decisions based on their own research, supported by proxy voting research from Glass Lewis. All voting is undertaken by the Investment Team, with oversight provided by our Responsible Investment Committee. In order to vote, some markets require shares to be temporarily immobilised from trading until after the shareholder meeting has taken place (referred to as 'share blocking'). Some other markets require a local representative to be hired, under a Power-of-Attorney (POA), to attend the meeting and vote on our behalf. In such instances, it may sometimes be in clients' best interests to refrain from voting. But in all other circumstances we endeavour to exercise our voting responsibilities on clients' behalf. For more information, please see our Voting Policy, available on our website.

Voting Overview *	
Number of companies available to vote	25
Number of available proposals	371
% voted	86%
% did not vote** (2 companies)	14%
% votes in line with management	74%
% votes against management	26%

**This includes where we do not vote in jurisdictions where share blocking is in effect or power of attorney requirements apply

Voting Case Studies

State Street is a global financial services provider, specialising in investment management. At the 2024 AGM, we voted against the reelection of CEO and Chair, Mr. Ronald O'Hanley, alongside 7% of other shareholders. The rationale behind our vote was primarily due to concerns regarding the tenure of Lead Independent Director (LID), whose 18-year tenure raised questions about board independence. We advocate for the separation of the Chair and CEO roles to reinforce checks and balances and prevent the concentration of decisionmaking power in one individual. In cases where the roles are combined, we believe a strong independent oversight mechanism, such as the LID, is critical for board effectiveness. We also believe that long director tenures, particularly those exceeding 15 years, can undermine objectivity and challenge decision-making, particularly when relationships with management and fellow board members become too entrenched. Therefore, we did not support this re-election.

Franklin Resources is a global investment management company offering a range of investment solutions. At the 2024 AGM, we did not support the re-election of Geoffrey Yang, alongside 13% of shareholders. Mr. Yang serves as the Chair of the Nomination Committee, and we were concerned that the board does not meet the 30% female diversity threshold. We view gender diversity as a key element of strong governance, helping to bring a range of viewpoints to the board. This lack of diversity led to our decision to vote against his re-election.

Engagement Case Studies

BlackRock.

BlackRock is a global investment management firm. We initially contacted BlackRock in November 2022 to express concerns about the degree of discretion in some elements of its executive remuneration packages. In a call with the company in February 2023, we were reassured that such discretionary adjustments are made by the remuneration committee to account for exogenous market fluctuations beyond management's control. However, in 2023 and 2024, we re-engaged with BlackRock to raise additional concerns regarding their Remuneration Policy, including the lack of fixed limits, non-formulaic compensation calculations, and the disconnect between pay and performance. We remain committed to maintaining an open dialogue with BlackRock to continue addressing these issues.

regulation.

Coronation Fund Managers is a South African investment management company. In 2024, we participated in the CDP Non-Disclosure Campaign, where we requested Coronation Fund Managers submit to the CDP Climate Change questionnaire. As a lead signatory on behalf of Guinness Global Investors and several other investors, we emphasised the importance of transparency in climate-related disclosures. We look forward to continuing discussions with the company on this important issue to encourage their participation in CDP reporting and enhance environmental visibility and accountability.

Collaborative engagement

We are a member of **CDP**, which allows us access to environmental data for all companies that report to CDP. Through our membership, we participate in collaborative engagements, such as the **CDP Non-Disclosure Campaign (NDC)**. The NDC aims to drive further corporate transparency around climate change, deforestation and water security, by encouraging companies to respond to CDP's disclosure requests.
